## ⦿ Most Common Keywords Test

There is likely no optimal keyword density (search engine algorithms have evolved beyond keyword density metrics as a significant ranking factor). It can be useful, however, to note which keywords appear most often on your page and if they reflect the intended topic of your page. More importantly, the keywords on your page should appear within natural sounding and grammatically correct copy.

8 pipeline 6 partnerships 6 news 6 discovery 5 careers

## ✘ Keywords Usage Test

The most common keywords of this webpage are not distributed across the important HTML tags! Primary keywords should appear in title tag, meta description and heading tags to help Search Engines to properly identify the topic of this webpage.

Keyword	Title tag	Meta description	Headings
pipeline	✘	✘	✓
partnerships	✘	✘	✘
news	✘	✘	✘
discovery	✘	✓	✓
careers	✘	✘	✘

## ○ Keywords Cloud Test

## ⦿ Related Keywords Test

This URL is currently ranked in the top 20 organic Google listings for the search terms below:

- [atomwise](#)
- [atomwise stock](#)
- [atomwise.](#)
- [atomwise layoffs](#)
- [mike pepi](#)
- [neely mozaffarian](#)
- [gpu technology conference](#)
- [ai drug discovery company](#)
- [atomwise stock](#)
- [drug discovery software](#)

## ⦿ Competitor Domains Test

This domain has an Authority Score of 30/100 while the Average Authority Score of top 100 sites is 89.5. Some of the most relevant competitors for this domain are listed below:

## ✔ Heading Tags Test

This webpage contains headings tags.

### H1 tags

---

Artificial Intelligence for Drug Discovery

### H2 tags

---

Discovering & Developing New Drugs

---

Leading Technology Development & Application

---

Focusing Expertise on the Most Challenging Problems

---

Learn more about our portfolio, pipeline, and career opportunities.

## ✔ Robots.txt Test

Congratulations! Your site uses a "robots.txt" file.

<https://www.atomwise.com/robots.txt>

## ✔ Sitemap Test

This website has a sitemap file.

<https://www.atomwise.com/sitemap.xml>

## ✔ SEO Friendly URL Test

All links from this webpage are SEO friendly.

## ✘ Image Alt Test

This webpage is using "img" tags with empty or missing "alt" attribute!

### How to pass this test?

In order to pass this test you must add an **alt** attribute to every **<img>** tag used into your webpage.

An image with an alternate text specified is inserted using the following HTML line:

```

```

Remember that the point of alt text is to provide the same functional information that a visual user would see. Search engines, users who disabled images in their browsers and other agents who are unable to see the images on your webpage can read the alt attributes assigned to the image since they cannot view it.

Learn more about [optimizing images for SEO](#).

## ✔ Responsive Image Test

All images in this webpage are properly sized for different users' viewports.

## ✔ Image Aspect Ratio Test

All image display dimensions match the natural aspect ratio.

## Inline CSS Test

This webpage is using inline CSS styles!

### How to pass this test?

It is a good practice to move all the inline CSS rules into an external file in order to make your page "lighter" in weight and decrease the code to text ratio.

- check the HTML code of your page and identify all style attributes
- for each style attribute found you must properly move all declarations in the external CSS file and remove the style attribute

For example:

```
<!--this HTML code with inline CSS rule:-->
<p style="color:red; font-size: 12px">some text here</p>

<!--would became:-->
<p>some text here</p>

<!--and the rule added into your CSS file:-->
p{color:red; font-size: 12px}
```

## Deprecated HTML Tags Test

This webpage does not use HTML deprecated tags.

## Google Analytics Test

This webpage is using Google Analytics.

## Favicon Test

 This website appears to have a favicon.

## 🕒 Backlinks Test

This domain has an Authority Score of 30/100 while the Average Authority Score of top 100 sites is 89.5. Also, this domain has 9,302 backlinks from 1,679 referring domains and some recently found backlinks are listed below:

## ✖ JS Error Test

We've found JavaScript errors on this webpage!

### How to pass this test?

If your site has JavaScript errors it might not work properly, which can lead to improper or incomplete loading of content. It's hard to advise how to fix JavaScript errors since there are many different types, but here are some tips:

- First of all, you have to locate the source of errors;
- If you are using JS plugins or other third party code, you must carefully read the documentation;
- Syntax errors (a typo or missing character) are easy to fix;

## ⚠ Console Errors Test

This webpage has some warnings caught by the Chrome DevTools Console!

### How to pass this test?

In order to pass this test, you have to fix all the warnings reported in Chrome DevTools console. You can also visit Google's documentation for further troubleshooting support:

<https://developer.chrome.com/docs/devtools/issues/>

## ✔ Charset Declaration Test

This webpage has a character encoding declaration.

```
Content-Type: text/html; charset=UTF-8
```

## ✔ Social Media Test

This webpage is connected successfully with social media using:

[Twitter](#)

## Speed optimizations

3 Failed

0 Warnings

22 Passed

## ✔ HTML Page Size Test

The size of this webpage's HTML is **15.12 Kb** and is under the average webpage's HTML size of **33 Kb**. Faster loading websites result in a better user experience, higher conversion rates, and generally better search engine rankings.

## ✔ DOM Size Test

The Document Object Model (DOM) of this webpage has **224 nodes** which is less than the recommended value of **1,500 nodes**.

## ✔ HTML Compression/GZIP Test

This webpage is successfully compressed using **br compression** on your code. The HTML code is compressed from **61.17 Kb** to **15.12 Kb (75% size savings)**. This helps ensure a faster loading webpage and improved user experience.

## ✔ Site Loading Speed Test

The loading time of this webpage (measured from N. Virginia, US) is around **3.99 seconds** and this is under the average loading speed which is **5 seconds**.

## ✔ JS Execution Time Test

The JavaScript code used by this webpage is executed in less than **2 seconds**.

## ✖ Page Objects Test

This webpage is using more than 20 http requests, which can slow down page loading and negatively impact user experience!

### Content size by content type

Content type	Percent	Size
Image	57.0 %	1.50 Mb

### ✓ Page Cache Test (Server Side Caching)

This webpage is using a caching mechanism. [Caching](#) helps speed page loading times as well as reduces server load.

## ✓ Flash Test

This webpage does not include flash objects (an outdated technology that was sometimes used to deliver rich multimedia content). Flash content does not work well on mobile devices, and is difficult for crawlers to interpret.

## ✓ CDN Usage Test

This webpage is serving all images, javascript and css resources from CDNs.

## ✗ Modern Image Format Test

This webpage is not serving images in a modern format! Image formats like [JPEG 2000](#), [JPEG XR](#), and [WebP](#) often provide better compression than PNG or JPEG, which means faster downloads and less data consumption.

### How to pass this test?

In order to pass this test, convert all the images listed in this report into a modern image format such as [JPEG 2000](#), [JPEG XR](#) or [WebP](#).

It's important to understand that the modern image formats, like WebP, are not yet widely supported across all devices and browsers. You can find [here](#) a full list of supported browsers and devices for the WebP format.

If your target audience falls within one of the unsupported browser/device categories, you should serve optimized fall-back images in the original JPEG/PNG format so that your users don't see a broken or badly designed page:

```
<!--Before:-->

<!--After:-->
<picture>
  <source type="image/webp" srcset="image.webp">
  
</picture>
```

The browser uses the first listed source that's in a format it supports. If the browser does not support any of the formats listed in the "source" tags, it falls back to loading the image specified by the "img" tag.

## ✓ Image Metadata Test

This webpage is not using images with large metadata.

## ✓ Image Caching Test

This website is using cache headers for images and the browsers will display these images from the cache.

## ✓ JavaScript Caching Test

This webpage is using cache headers for all JavaScript resources.

## ✔ CSS Caching Test

This webpage is using cache headers for all CSS resources.

## ✔ JavaScript Minification Test

All JavaScript files used by this webpage are minified.

## ✔ CSS Minification Test

All CSS resources used by this webpage are minified.

## ✘ Render Blocking Resources Test

This webpage is using render blocking resources! Eliminating render-blocking resources can help this webpage to load significantly faster and will improve the website experience for your visitors.

### How to pass this test?

In order to pass this test, you have to reduce the impact of render-blocking resources.

First, you have to identify what's critical and what's not. You can use the [Chrome DevTools \(Coverage tab\)](#) to identify non-critical CSS and JS.

Once you've identified critical code, you can try the below methods to eliminate render-blocking resources:

- inline critical JS within a script tag in your HTML document
- inline critical CSS required for the first paint inside a style block in the head of the HTML document
- move the script and link tags at the end of the HTML document
- add async or defer attributes to non-critical script or link tags
- split CSS styles into different files, organized by media query
- compress and minify your text-based resources

## ✔ Nested Tables Test

This webpage is not using nested tables. This speeds up page loading time and optimizes the user experience.

## ✔ Frameset Test

This webpage does not use frames.

## ✔ Doctype Test

This webpage has a doctype declaration.

```
<!DOCTYPE html>
```

## ✔ URL Redirects Test

This URL doesn't have any redirects (which could potentially cause site indexation issues and site loading delays).

## ✔ Largest Contentful Paint Test

The Largest Contentful Paint duration of this webpage is 1.34 seconds. To provide a good user experience, [Google recommends](#) that sites should strive to have Largest Contentful Paint of 2.5 seconds or less.

**Largest Contentful Paint element within the viewport:**

**Text:** Artificial Intelligence for Drug Discovery We use our AI engine to transform dr...

**Html:** <section class="cover" style="background-image: url('https://www.atomwise.com/wp...')>

## ✔ Cumulative Layout Shift Test

The CLS score of this webpage is 0.0193. To provide a good user experience, [Google recommends](#) that sites should strive to have a CLS score of 0.1 or less.

**DOM element which contributes the most to CLS score:**

**Text:** Artificial Intelligence for Drug Discovery We use our AI engine to transform dr...

**Html:** <div>

**Score:** 0.0193

## Server and security

8 Passed

## ✔ URL Canonicalization Test

<https://www.atomwise.com/> and <https://atomwise.com/> resolve to the same URL.

## ✔ SSL Checker and HTTPS Test

This website is successfully using HTTPS, a secure communication protocol over the Internet.

- ✔ The certificate is not used before the activation date.
- ✔ The certificate has not expired.
- ✔ The hostname "www.atomwise.com" is correctly listed in the certificate.
- ✔ The certificate should be trusted by all major web browsers.
- ✔ The certificate was not revoked.
- ✔ The certificate was signed with a secure hash.

### Certificate Chain:

Server certificate	
Common Name	www.atomwise.com

### ✓ Mixed Content Test (HTTP over HTTPS)

This webpage does not use mixed content - both the initial HTML and all other resources are loaded over HTTPS.

### ✓ HTTP2 Test

This webpage is using the HTTP/2 protocol.

### ✓ Safe Browsing Test

This website is not currently listed as suspicious (no malware or phishing activity found).

### ✓ Server Signature Test

The server signature is off for this webpage.

### ✓ Directory Browsing Test

Directory browsing is disabled for this website.

### ✓ Plaintext Emails Test

This webpage does not include email addresses in plaintext.

## ✘ Unsafe Cross-Origin Links Test

This webpage is using `target="_blank"` links without `rel="noopener"` or `rel="noreferrer"` attribute, which can expose it to performance and security issues!

### How to pass this test?

In order to pass this test, you have to update each link identified in this report, by adding a `rel="noopener"` or a `rel="noreferrer"` attribute or both:

```
<a href="https://example.com" target="_blank" rel="noopener noreferrer">
  Click here
</a>
```

- `rel="noopener"` prevents the new page from being able to access the `window.opener` property and ensures it runs in a separate process.
- `rel="noreferrer"` has the same effect but also prevents the **Referer header** from being sent to the new page.

## Mobile usability

0 Failed

0 Warnings

3 Passed

## ✔ Meta Viewport Test

This webpage is using a viewport meta tag.

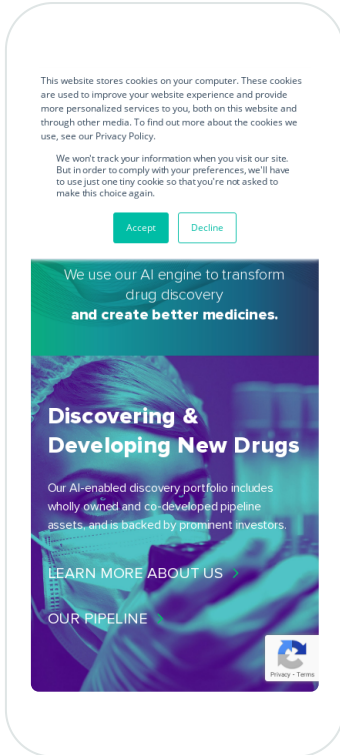

```
<meta name="viewport" content="width=device-width, initial-scale=1.0" />
```

## ✔ Media Query Responsive Test

This webpage is using CSS media queries, which is the base for responsive design functionalities.

## Mobile Snapshot Test

### ✖ Structured Data Test

This webpage doesn't take the advantages of HTML Microdata or JSON-LD specifications in order to use structured data! View Google's guide for [getting started with structured data](#).

#### How to pass this test?

HTML5 Microdata is an easy way to add semantic markup to your web pages. Search engines rely on this markup to improve the display of search results, making it easier for people to find the right web pages.

Here is a simple example of how to use HTML5 microdata in your contact web page:

```
<div itemscope itemtype="http://schema.org/Person">
  <span itemprop="name">Joe Doe</span>
  <span itemprop="company">The Example Company</span>
  <span itemprop="tel">604-555-1234</span>
  <a itemprop="email" href="mailto:joe.doe@example.com">
    joe.doe@example.com
  </a>
</div>
```

### ✔ Custom 404 Error Page Test

This website is using a custom 404 error page. We recommend to have a custom 404 error page in order to improve the website's user experience by letting users know that only a specific page is missing/broken (and not the entire site), providing them helpful links, the opportunity to report bugs, and potentially [track the source of broken links](#).

### ✔ Noindex Tag Test

This webpage does not use the noindex meta tag. This means that it can be indexed by search engines.

### ✔ Canonical Tag Test

This webpage is using the canonical link tag. This tag specifies that the URL: <https://www.atomwise.com/> is preferred to be used in search results. Please ensure that this specification is correct, as canonical tags are often hard-coded and may not always reflect the latest changes in a site's URL structure.

```
<link href="https://www.atomwise.com/" rel="canonical"/>
```

### ⦿ Nofollow Tag Test

This webpage does not use the nofollow meta tag. This means that search engines will crawl all links from this webpage.

## Disallow Directive Test

Your robots.txt file includes a disallow command which instructs search engines to avoid certain parts of your website! You are advised to confirm if access to these resources or pages are intended to be blocked (e.g., if they contain internal-only content or sensitive information).

## Meta Refresh Test

This webpage is not using a meta refresh tag.

## SPF Records Test

This DNS server is using an SPF record.

```
v=spf1 include:_spf.google.com ~all
```

## Ads.txt Validation Test

This website doesn't use an ads.txt file! Ads.txt is a text file that contains a list of Authorized Digital Sellers. The purpose of ads.txt files is to give advertisers and advertising networks the ability to verify who is allowed to sell advertising on your website.
